

Cut Flowers

AMARANTHUS

Amaranthus cruentus

Annual Plug Lead Time: 9 wks

ARABIAN **NEW**

Hot series for sales from summer through to late autumn. Amaranthus is originally from India and prefers warm and sunny conditions. The crop is mainly for outdoor production. Unique arrangement flower. Height 1m +. **300 Seeds/gram**

1462 **green** seed avail Feb 2010

1418 **red**

AMMI

majus Bishops Flower/Queen Anne's Lace

Annual Plug Lead Time: 9 wks

GRACELAND

Graceland has strong and straight stems for an easier harvest. Very uniform growth, more quality stems, better return per m². Healthy dark green foliage, less cleaning during harvest. Sideshoots don't overgrow main umbel, manageable height. Large and flat flower umbels. Plug time 4-6 weeks. Finish time 8-10 weeks. Flowering time 4 weeks. Sales window throughout Summer. Height 100-140cm. **2,000 Seeds/gram**

4747 **Graceland** - white

AMMI

visnaga Bishops Flower/Queen Anne's Lace

Annual Plug Lead Time: 9 wks

CASABLANCA

Sideshoots don't overgrow main umbel, maintaining a manageable height. Strong and straight vertical stems for easier harvest. Earlier and more uniform providing a better return per m². Large umbels offer great sales appeal. For greenhouse and outdoor production, with high vigour and germination. Plug time 4-6 weeks. Finish time 10-13 weeks. Flowering time 5 weeks. Sales window throughout Summer. Height 100-125cm. **2,000 Seeds/gram**

4916 **Casablanca** - white

ANEMONE

coronaria

Annual Plug Lead Time: 10 wks

MARIANNE

Shipping of Anemone orders starts from week 12.

Giant tetraploid flowers borne on long strong stems. Shows good tolerance to botrytis, due to the thick petals and strong leaves. Mix contains Blue, Red, White/Rose and White

with Black Centre. **1,800 Seeds/gram**

- 1043 **Blue**
- 1045 **Red**
- 1047 **White**
- 1046 **White Black Centre**
- 1044 **Mix**

ANTIRRHINUM

majus F1 Forcing Snaps (Snapdragons)

Annual Plug Lead Time: 9 wks

Group 1 & 2 (Winter Forcing)

OVERTURE™ F1

The latest snapdragon breeding that vastly improves upon current varieties in its own right. Exhibiting the desired stem qualities with large clusters of florets. Overture is earlier to flower than Opus, it's stablemate. Height 100-130cm. **6,000 Seeds/gram**

- 1100 **Ivory**
- 1101 **Light Bronze**
- 1102 **Light Pink**
- 1103 **Magenta**
- 3717 **Orange**
- 1104 **Pink**
- 1105 **Plum Blossom**
- 1106 **Red**
- 1980 **Rose** new colour
- 1107 **White**
- 1108 **Yellow**

Group 2 & 3 (Autumn & Spring Forcing)

CHANTILLY F1

The delicate butterfly type snapdragons offer beauty to any arrangement. They will bloom early when grown under low temperatures. Days from sow to flower are 110 - 130 days. Chantilly grows like a traditional snapdragon. Height is 120-140cm. **6,000 Seeds/gram**

- 1057 **Bronze with Throat**
- 1058 **Cream Yellow**
- 4991 **Deep Orange**
- 1059 **Light Pink**
- 1060 **Light Salmon**
- 1062 **Pink**
- 1063 **White**

Group 3 & 4 (Summer Forcing)

OPUS™ F1

Another quality snapdragon in this later flowering group from the same breeding as Overture. With most of the important colours available at present, it is a variety of the future that improves upon Monaco and Potomac. Height 100-130cm. **6,000 Seeds/gram**

- 1092 **Apple Blossom**
- 1114 **Bright Red** new colour
- 3445 **Early Bronze**
- 4981 **Early Pink**
- 3606 **Early White**

1973 **Fresh White** new colour

- 1093 **Ivory**
- 1094 **Lavender**
- 1095 **Pink**
- 1096 **Plum Blossom**
- 2053 **Red** new colour
- 1097 **Rose**
- 1098 **White**
- 1099 **Yellow**

Group 2 & 3 Varieties Suitable for Growing Outdoors or in Covered Structures during Spring & Autumn

SUNSHINE F1

Only available as Plugs

Sturdy stems support dense columns of bright flowers. Long spikes 90cm are suitable for any floral arrangements as well as the home garden. **6,000 Seeds/gram**

3389 **Deep Purple Eye**

3388 **Light Purple Eye**

ROCKET F1

Rocket snaps are the standard cut flower strain used in home gardens and by outdoor, professional cut flower growers. The professional grower can obtain two crops if plants of the first crops are transplanted by early summer. These summer flowering varieties have excellent flowering quality. Garden height: 1 to 1.2m. **6,000 Seeds/gram**

1115 **Mix**

ASTER

C. chinensis (Callistephus)

Annual Plug Lead Time: 9 wks

HANA

Aster Hana has very small 3.5cm flowers, very suitable for bouquets and flower arrangements. Single flowers contrast nicely between bright yellow centres and petals. **450 Seeds/gram**

- 4460 **Blue**
- 4437 **Blue Tipped**
- 4461 **Deep Blue**
- 4432 **Deep Rose**
- 4462 **Pink**
- 4434 **Rose**
- 4438 **Rose Tipped**
- 4435 **Scarlet**
- 4436 **White**

MAGGIE WHITE

Maggie has a single white flower with a yellow disk similar to a Marguerite Daisy. The stems branch well for an ideal spray habit and can be used as a filler in mixed bouquets. Maggie is very productive with a profusion of blooms on each stem. Flower size is approximately 3-4cm in diameter. **500 Seeds/gram**

1155 **White**

Cut Flowers

MATSUMOTO

Exciting Japanese Aster with Pompom spray type flowers. The complete plant can be harvested at once. Matsumoto is also very good for spring and autumn glasshouse production. Due to its uniformity and large colour range, one of the better Callistephus varieties for fresh cutflower production at this moment. Very early flowering strain with half double, medium size flowers and bright cream yellow centres. Little branched, upright plant habit and long, strong stems. Height 70cm. **500 Seeds/gram**

- 1150 **Apricot** - apricot peach
- 1151 **Blue**
- 1154 **Blue Tipped White**
- 1153 **Blush** - soft pink
- 1157 **Light Blue**
- 1159 **Pink**
- 1160 **Pink Tipped White**
- 1161 **Rose**
- 1162 **Salmon**
- 3590 **Scarlet** - bright scarlet
- 1163 **White**
- 1164 **Yellow**
- 1158 **Mix**

RAINBOW DOUBLES

Full colour mix, each flower has several rows of petals with a bright yellow centre.

450 Seeds/gram

- 1147 **Mix**

BELLS OF IRELAND

M.leavis (Molucella)

Annual Plug Lead Time: 9 wks

BELLS OF IRELAND

Excellent cut and dried flower with extra tall, lime green flower or calyces that top 25-30cm. The flower itself is an insignificant white bloom in the centre of the bell. Harvesting can start as soon as stems are long enough and calyces are well formed. Pinching delays cutting but gives more stems per plant. NB: the true leaves should be removed from between the calyces for the best ornamental product. Height 50-90cm. **150 Seeds/gram**

- 1263 **Irish Green Bell**

CALENDULA

officinalis

Annual Plug Lead Time: 8 wks

NAKAYASU

replaces Prince colours

Indent Line

Nakayasu is basal branching, with good vigour and uniformity. Calendula's prefer cool temperatures, however during the cold season do not overwater as moist conditions will lead to black rot. When grown during hot conditions the flowers will be smaller. By pinching the

www.highsun.com.au

centre stem 60 days after sowing, the plant will produce 8-10 good quality cut flowers.

Height 91-110cm. **130 Seeds/gram**

- 1291 **Golden** - golden yellow

- 1290 **Orange** - bright orange

PRINCE

Indent Line

Becoming increasingly popular, Prince can be grown year round as not daylength sensitive. Good double flowered cutting series for cool greenhouse and outdoor culture, suitable for forcing. Height 60cm. **130 Seeds/gram**

- 1289 **Indian** - bronze orange, dark heart

CAMPANULA

medium (Canterbury Bells)

Perennial Plug Lead Time: 13 wks

CHAMPION F1

Champion is an attractive cutflower which is also suitable for production in big containers. Fast finishing, high yielding series has bell shaped, 4cm diameter blooms. Uniform, basal branching plants with 8-10 stems per plant. Height 65cm.

750 Seeds/gram

- 1292 **Blue**

- 3444 **Lavender**

- 1293 **Pink**

- 1294 **White**

CAMPANULA

rapunculus

Perennial Plug Lead Time: 13 wks

HEAVENLY BLUE

Heavenly Blue is a form of Campanula for cut flower production that does not require vernalisation to initiate flowering. Through daylength manipulation, using "mum lights", moderate temperatures of 13°C, scheduled flowering allows continuity of supply. Crop production and timing is similar to C.medium Champion series. Height 60-80cm.

12,000 Seeds/gram

- 3430 **Blue**

CAPSICUM

annum

Annual Plug Lead Time: 9 wks

CONICAL

Indent Line

A variety specifically for cut flower production with colourful round and unique fruits. As fruits come together at the top of plants, you can then strip the leaves.

120 Seeds/gram

- 1313 **Gold**

- 1314 **Orange**

- 1315 **Scarlet**

SHORT

Indent Line

Many smaller and long triangular fruits are displayed. Stem length is 40 - 50 cm.

120 Seeds/gram

- 1336 **Scarlet**

CELOSIA

argentea cristata (Cockscomb)

Annual Plug Lead Time: 8 wks

BOMBAY

High quality greenhouse series has a 3-4 week shorter crop time than standard cutflower celosia. Bombay has round stems, flat triangular combs, truly uniform growth, 13-15wk culture, 64 plants m², stress resistant, excellent shipability, vase life of upto 3 weeks. Protected by Plant Breeders Rights & Plant Variety Protection. A few colours have been awarded the Fleuroselect Gold Medal. Height 100-120cm.

1,000 Film Coated Seeds/gram.

(A number of growers have experienced difficulty producing this crop, it has been found that it is essential to grow the crop at the correct time of year which will vary with your location in Australia. This crop has been bred for European conditions for flowering into spring and summer therefore every attempt should be made to time this variety for conditions that most resemble that. Bombay Purple and Yellow Gold have proven to give the best results. Immediate planting after receipt is vital.)

- 4591 **Fiore** - orange comb and rose orange neck

- 1364 **Fire** - warm red

- 1369 **Rose** - bright rose

- 1373 **Yellow Gold** - bright yellow Fleuroselect Quality Mark Winner

CHIEF

Indent Line

Only available as Plugs

Stiff upright, non branching stems with large Cockscombs in a remarkable range of clear, showy colours. Height 100cm.

1,400 Seeds/gram

- 1375 **Bicolour**

- 1376 **Carmine**

- 1378 **Fire**

- 1380 **Gold**

- 1382 **Persimmon**

- 1381 **Mix**

KURUME

Kurume varieties are crowned with grand combs of vivid colours. They have a very high tolerance of heat, drought and disease. They are prized for summertime cut flower use. Dense plantings, spaced 10-15cm apart will produce smaller combs and thinner stems.

1,400 Seeds/gram

Cut Flowers

- 4463 **Gold**
4590 **New Scarlet** - red leaf
4463 **Orange Red** *formerly Scarlet*
4456 **Rose** - green leaf

CELOSIA

plumosa

Annual Plug Lead Time: 8 wks

CENTURY

Century series produces extremely large plumes averaging 30cm long with numerous basal branches. All plants in this series produce a number of huge, well-formed plumes with identical plant and flowering habit, suitable for large scale outdoor cut flower production. Very impressive due to massive colourful plumes. Will begin to flower about 80 days from sowing, extra early and very easy to grow. Height 70cm. **1,400 Seeds/gram**
1374 **Mix** - fire, red, rose & yellow

DURAN

NEW

Duran is very popular among arrangement celosia with an assortment of vivid yellow and red. This variety flowers from November through to March. **1,400 Seeds/gram**
1419 **Gold**
1420 **Red**

LIME SPIRES

NEW

Lime green feather Celosia is excellent as a green bouquet filler as well as for all kinds of arrangements. Spires responds very well to light and temperature. In the greenhouse with lighting and heating, winter production is possible. **1,400 Seeds/gram**
4478 **Lime**

CELOSIA

spicata

Annual Plug Lead Time: 8 wks

PARFAIT

Parfait has a vigorous branching habit, it is suitable for branching crops and upto 30 branches per plant can be harvested. Space 30-40cm, one row in 90cm ridge, 90cm pathway. Pinch when 10-15cm in plant height. Height upto 1m. **1,400 Seeds/gram**
1388 **Burgundy** - wine red
1389 **Light Pink** - light pink
1390 **Ruby** - ruby wine

COSMOS

bipinnatus Tetra

Annual Plug Lead Time: 7 wks

DELPHINIUM

x belladonna

Annual Plug Lead Time: 10 wks

ANGEL SUPER

replaces Angel Series

Super Angel is a spray type of delphinium which makes an excellent filler for bouquet work. Crop height is uniform within the colours which range from 65 – 90 cm. Unlike column delphiniums, Super Angel retains all petals after harvest, increasing customer satisfaction. Foliage is fine and easy to work with and makes cutting economical. Up to 10 stems are possible including the second crop. **400 Seeds/gram**
4414 **Super Blue**
4419 **Super Blush** **new colour**
4415 **Super Lilac**
4416 **Super Pink** **new colour**
4417 **Super Sky Blue**

BELLADONNA

Light blue single, capped florets. Height 120cm. **400 Seeds/gram**
1571 **Belladonna** - light blue

BELLA MOSUM

Deep blue florets. Height 120cm. **400 Seeds/gram**
1572 **Bellamosum** - deep blue

BLUE DONNA

NEW

SEMI DOUBLE

replaces Blue Shadow

Improved uniformity and colour, increased productivity, more stems per sqm (multiple flush crop). Fast culture, 12-16 weeks from planting. Heat tolerant, low disease sensitivity. Blue Donna is PBR protected. Height : 80-100 cm. Plug time: 6-8 weeks, Finish time: 12-16 weeks, Flowering time: 4 weeks. **450 Seeds/gram**
1577 **Blue Donna**

CASABLANCA

White capped blooms, contains a small % of pale blue. Height 120cm. **400 Seeds/gram**
1579 **Casablanca** - white

DELPHINIUM

x elatum

Annual Plug Lead Time: 10 wks

AURORA F1

Aurora is especially bred for short day production schedules and is very early. Aurora produces a uniform flush of high quality spikes on stems with a consistent medium diameter. F1 hybrid vigour results in better quality and consistency from subsequent flushes. Aurora is extremely stable and is suitable for greenhouse, tunnel or open field production. Height 70-80cm. **400 Seeds/gram**
3631 **Blue**
3632 **Deep Purple**
3633 **Lavender**
3634 **Light Blue**
3586 **White Shades**

MAGIC FOUNTAINS

Magic Fountains has the widest range of colours in a dwarf Pacific type. It is recommended for windy areas where tall types are damaged, as they do not require staking. Excellent for cut flower production. Height 80cm. **500 Seeds/gram**
4983 **Cherry Blossom/White Bee**
1584 **Dark Blue/Dark Bee**
1585 **Dark Blue/White Bee**
1586 **Lilac Pink/White Bee**
1588 **Sky Blue/White Bee**
1589 **White**
1587 **Mix**

Cut Flowers

TRITON

Triton was a clear standout in our 2006 Spring Trials. Clearly superior to Aurora in all aspects. Two colours kick off this series including the popular dark blue. Triton has easy to handle stem calliper - not too thick, densely packed florets form a long head. Triton offers 30% faster return crops than existing varieties. With higher stem counts per plant, making them easier for Florists to use. Height 1.5-2m.

400 Seeds/gram

- 4956 **Dark Blue/White Bee**
- 4957 **Light Blue/White Bee**

DELPHINIUM

x cultorum x hybrida

Annual Plug Lead Time: 10 wks

PACIFIC GIANTS

All of these plants have white bees, except Blue Jay and Black Knight, which have dark bees. Astolat can produce both creamy white and dark bees. Height 1.5m.

450 Seeds/gram

- 1570 **Astolat** - bluish pink shades with darker tones
- 1576 **Black Knight** - dark blue, dark bee
- 1573 **Blue Bird** - mid blue
- 1575 **Blue Jay** - medium blue, dark bee
- 1578 **Cameliard** - lavender rose

GROUP 1 - MID FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma

BRIDAL F1

NEW

The first colour in a specially selected range with a unique bud form for Lisianthus. The series will be especially useful for wedding arrangements and bouquets. The series is top flowering with buds of medium size. The upper stems are strong and resist floppiness. Group 1 timing, so is suited to most times of the year. Bridal Yellow perfectly shaped buds show a hint of lime when tight. As the outer petals unfurl the buds take on the appearance of a rose.

3598 **Yellow**

ECHO F1

100% double flowering. Depending on culture, flowering time can be equal or up to 3 weeks later than the other group one varieties. Plant habit is less vigorous than Mariachi. Early flowering. Height 70cm. 800 Seeds/gram

1963 **Blue** - mid blue

1964 **Blue Picotee** - white centre with blue edging

Cut Flowers

- 1965 **Champagne** - delicate yellow base, pastel pink rim
- 1966 **Lavender** - soft orchid lavender
- 1968 **Pink** - white centre with pink edging
- 1969 **Pink Picotee** - peach centre, rose edges
- 1970 **White** - clear white
- 1971 **Yellow** - contains 4% singles, medium light yellow
- 1967 **Mix** - formula mix of series colours

GEM F1

Gem Series is a Group 1 flowering type. It starts with 4 colours of uniform flowering quality, exhibiting full doubleness on strong stems with medium to large heads. The open flowers are tidy and well presented towards to the top of the stems. Height 90cm. **800**

Seeds/gram

- 3595 **Blue**
- 1152 **Blue Picotee**
- 4859 **Green**
- 4860 **Misty Blue**
- 4706 **Pink**
- 1995 **White** *new colour*

GROUP 1-2 - MID FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

MAGIC™

Formerly Gp 0. Latest European breeding delivers this early flowering series. Flower form and bud colour is what the market requires today, being pointed and showing colour on the outer furled petals before opening. Vigour is proving to be exceptional in the plug. **800 Seeds/gram**

- 2022 **Blue**
- 2023 **Champagne**
- 4503 **Deep Blue**
- 4890 **Misty Pink**
- 1168 **Pink** *new colour*
- 2024 **Rose**
- 4444 **Rose Picotee**
- 2026 **White**
- 2027 **Yellow**

GROUP 0-1 - MID FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

SUPER MAGIC™

Super Magic is the sister line to "Magic". Overall quality is superior to Magic due to taller stems and higher petal count. Well suited to late Spring Summer production. **800**

- Seeds/gram**
- 4002 **Deep Blue**
- 2081 **Lavender Blue**
- 2082 **Lavender**

- 3640 **Peach**
- 2083 **Purple**
- 2084 **White**
- 3565 **Mix**

GROUP 2 - LATE FLOWERING (2 WEEKS LATER)

ADVANTAGE F1

Advantage is a new double flowered mid early series with nice flower shape. Excellent long and strong stem quality. The Advantage series contains 4 spectacular colours. **800**

Seeds/gram

- 4891 **Cherry Sorbet** (*formerly Super Magic*)
- 5079 **Green**
- 5080 **Purple**
- 4892 **Yellow** (*formerly Super Magic*)

VALENTINE F1

Valentine series contains the standout colour of our 2006 Trials - Valentine Violet, which has a rose shaped bud of intense blue. The series topped the bud count of all the doubles trialed. Rose flowers 2 weeks later than Violet. Height 80cm. **800 Seeds/gram**

- 4864 **Rose**
- 4865 **Violet**
- 1449 **Yellow** *new colour*

GROUP 2 - LATE FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

HELIX F1

This series kicks off with outstanding novelty colours. Lavender is a shade lighter than Echo, but extremely double. Red is a unique colour. Violet Picotee is a unique colour, Summer flowering, must be grown for Summer harvest Nov to April for best picotee markings of any variety. Height 80cm. **800 Seeds/gram**

- 4861 **Lavender**
- 1996 **Lime**
- 2319 **Pink** *new colour*
- 4862 **Red**
- 4863 **Violet Picotee**
- 2320 **White** *new colour*

GROUP 3 - LATE FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

ARENA F1 NEW

Selected for it's high quality and very double flowers on strong and sturdy stems. Large buds on the top increase the attractive character of the stems. Less sensitive to short stem length under long day conditions. Less sensitive to rosetting in plug cultivation. **800 Seeds/gram**

- 2321 **Rose**

- 2322 **White**

BOUQUET F1 NEW

SPRAY TYPE

Two complementary colours suited to the summer flowering period. Exhibits similar flowering characteristics to Valentine series, but flowering 1-2 weeks later.

- 0000 **Pink Flash**
- 0000 **Rose Pink**

CESSNA F1 NEW

Cessna is ideally suited for harvest between February and April. A group 3 variety, flowering 2 weeks after Mariachi. It is in keeping with the selection philosophy of Gem and Helix. Top Flowering. Impressive bud counts means less stems per bunch. Medium - large flower size with high petal counts. Neat flower form that presents well. Strong, stiff upper stems for reduced flower droop.

- 1146 **Blue**
- 2320 **Pink**

GROUP 1-2 - LATE FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

MARIACHI F1

Only available as Plugs

The leading double flowering Eustoma series with a good flower stem quality. Full, 7-9cm flowers have an abundance of round petals. Flowers stand upright on long, strong stems. Height 50-90cm. **800 Seeds/gram**

- 2020 **Blue** - deep blue
- 2021 **Blue Picotee** - 60% picotee, 40% white
- 4705 **Carmine**
- 2028 **Lavender**
- 2030 **Lilac Picotee** - 60% lilac, 40% white
- 2029 **Lime** - soft pastel green
- 2031 **Misty Blue** - white with frosty blue streaks
- 2032 **Misty Pink** - white with frosty pink streaks
- 2033 **Pink** - mid pink
- 2034 **Pink Picotee** - 60% picotee, 40% white
- 2041 **White** - pure white
- 2042 **Yellow** - deep creamy yellow

LISIANTHUS - Singles

E.grandiflorum (Eustoma)

Annual Plug Lead Time: 16 wks

GROUP 0 & 1 - MID FLOWERING

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

Cut Flowers

CAESAR

Caesar is a special, unique and remarkable variety. Flowers are concentrated around the central flower, with two flowers constantly surrounding it. This symmetric performance immediately catches your attention. Common single flowers types only have five flower petals. Caesar is genetically different, with flower heads that have six flower petals and six stamen. A unique impression is offered to the consumer when all flowers are blooming around the central main flower. **800 Seeds/gram**

4632 **Violet Summer** - dark purple **new colour**

4 wks later than Violet Winter

3599 **Violet Winter** - dark purple

GROUP 1 - MID FLOWERING

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

PICCOLO F1

SPRAY TYPE - SMALLER FLOWERS

A multiflora with many cup shaped 3-3.5cm width, small flowers. Piccolo is distinct for its strong petals and very stiff stems. This gives it exceptional keeping qualities and means it is less sensitive to botrytis infections throughout transit. Height 80-90cm. **800 Seeds/gram**

2058 **Blue Rim** - deep blue - early season, summer

2060 **Green**

2061 **Pastel Blue** - soft lavender blue with paler base - early season, summer

2062 **Pastel Pink** - soft pink with paler base - early season, summer

2063 **Pink**

2064 **Pink Rim**

2066 **Rose** - rich rose red - early season

2067 **White** - clean pure white - early season, summer

2068 **Yellow** - rich creamy yellow - 4-5 days later than other colours

GROUP 2 - LATE FLOWERING (2 WEEKS LATER)

Full sun plantings of cutflower Eustomas will produce shorter stems than greenhouse grown Eustoma.

FLAMENCO F1

Mid season type. Plants finish 1-2 weeks after the Heidi Series. Height 60-90cm.

800 Seeds/gram

1988 **Purple** - deep vivid purple

MATRICARIA

T. parthenium (Tanacetum)
Plug Lead Time: 10 wks

16hrs of lighting is required for flowering; supplemental lighting may be solid or cyclic. Matricarias are not sensitive to ethylene.

AMAZONE

Indent Line

The best yellow selection with excellent growth, good length and quality of leaves.

1,000 Seeds/gram

2161 **Amazone** - yellow

GOLDMOON

Indent Line

Golden yellow pompom type. Less foliage and longer stems than Golden Ball. Better suited for year round production.

1,000 Seeds/gram

2164 **Goldmoon** - golden yellow

SNOW STAR

Indent Line

Professional cut flower for year round greenhouse production. Also suitable for outdoor production. Snow Star has high quality stems. Finish time is 7-13 weeks. Flowering time is 1-2 weeks. Height 70 cm.

7,000 Seeds/gram

4745 **Snow Star** - white with a yellow centre

SPIRIT

Indent Line

Spring Spirit - spring production, selection with beautiful contrast of pure white flowers on dark green foliage.

Very suitable for early spring production. Summer Spirit - summer production, makes longer and heavier stems during summer.

Therefore a GA spraying is not necessary under normal conditions. The flower is less white than Spirit. Very suitable for outdoor summer production. **1,000 Seeds/gram**

2166 **Spring Spirit** - white

2167 **Summer Spirit** - creamy white

VIRGO

Indent Line

The whitest flower with extremely dark green leaves. Virgo has erect leaves, so can be planted more densely than other varieties. Flowers are borne in clusters.

1,000 Seeds/gram

2168 **Virgo** - pure white

PHYSOSTEGIA

virginiana (Obedient Plant)
Plug Lead Time: 9 wks

CROWN

Erect plants with dense flower spikes. Strong border plant for large groups. Snow Crown is used as cutflower and can be grown as an annual. It flowers the first year when sown early and has a uniform habit.

400 Seeds/gram

2621 **Rose** - rose pink, 70cm

2620 **Snow** - white, 60cm

POPPY

P. nudicaule Papaver (Iceland Poppy)

Annual Plug Lead Time: 10 wks

AUSTRALIS

Outstanding poppy with strong stems and large flowers up to 15cm. Extremely wide colour range including bicouours, and picotee types.

8,000 Seeds/gram

2633 **Mix**

RANUNCULUS

asiaticus

Annual Plug Lead Time: 10 wks

Shipping of Ranunculus orders starts from week 12.

FRIANDINE F1

This early flowers series offers 100% double, large flowers with high and strong stems. An average of 10 stems per plant. Very good production in winter. **1,300 Seeds/gram**

2819 **Carmine**

1878 **Cream** **new colour**

1986 **Deep Pink** **new colour**

2825 **Gold** **new colour**

3643 **Lavender**

2827 **Lemon**

3644 **Mustard**

2830 **Orange**

4420 **Pastel**

2835 **Pink Picotee**

2836 **Rose Picotee** **new colour**

2843 **Violet**

2845 **White**

2847 **White Picotee**

2848 **Yellow Picotee**

2829 **Mix**

GIGA F1

NEW

New variety with huge flowers and very strong stems.

2816 **Pink**

3074 **White**

HIGHLINE F1

NEW

Flowering 1-2 weeks earlier than Friandine. Most colours are taller than Friandine. **1,300 Seeds/gram**

2822 **Orange**

3409 **Pink**

2839 **Salmon**

2841 **Scarlet**

REINETTE F1

NEW

Unique ranunculus with green centred flowers, Similar performance and characteristics to Friandine including height.

1,300 Seeds/gram

0000 **Cream**

2812 **Orange**

2354 **Rose**

2355 **White**

Cut Flowers

SOLIDAGO

Vegetative Tissue Culture
Plug Lead Time: 10 wks

PRINCESS GOLD

Princess Gold is top flowering, with good plant shape and high productivity. Same flowering speed as Tara. Flowers Spring, Summer, Autumn, Queensland - plant in Winter. Solidago flowers under long day length. Some growers get 3 years from 1 planting, mostly 2 years.

Yellow – deep yellow

- Plugs only grown in 128 trays.
- Minimum 2 trays.

Ordering:

Available **ONLY** for SHIPPING:
Aug (wk 32) to Jan (wk 4)

STATICE Sinuata

Vegetative Tissue Culture
Plug Lead Time: 16 wks

- * Plants arrive pre-cooled (Vernalised) ready to flower
- * Early to flower
- * Opens possibilities for Mothers Day flowering
- * Uniform production of high quality stems
- * Rich, vibrant colours
- * High stem count and weight
- * Less stems per bunch
- * Long life crop - upto 4 years
- * Durable bouquet filler
- * Plugs only grown in 70 Jiffy trays.
- Minimum 2 trays per colour.

Ordering:

- Allow 4 months lead time.
- Available **ONLY** for SHIPPING:
- Weeks 2, 8, 14
- # Luster Series is a Summer Statice
- Available **ONLY** for SHIPPING:
Aug (wk 37) to Sep (wk 41)

Note: Tissue Culture suppliers have a minimum order quantity. Highsun will group the orders together to achieve the supplier minimum.

SPRINT VIOLET

VERY EARLY TIMING

Violet - Less requirement for low temperatures, high productivity and requires less base fertiliser than others. Height 100-100cm.

1644 **Violet** – dark violet - most popular colour

CLEAR SNOW

NEW

EARLY TIMING

Pure white colour and good style. Sharp angled, hard strength stems. Weak to medium Botrytis Resistance. Suitable for warm. Height 95-105cm.

5273 **White** – pure white

www.highsun.com.au

CRYSTAL

EARLY TIMING

The best bright yellow available in the market. Nice clear colour, strong, even crop, fits with Jam, Million White and Earth colours. Height 85-95cm.

1566 **Yellow** – yellow

EARTH

EARLY TIMING

Earth Series has excellent stem quality. Height 100-110cm

Ocean - Stems grow straight into perfect shape. Colour comes out well. Nicer Light Blue than Earth Blue.

Pink - Calyces are big, with a high percentage of quality stems. Replaces Million Rose. Summer flowering.

1568 **Ocean** – sky blue - Early timing

1569 **Pink** – pink - Mid timing

MILLION

EARLY TIMING

Pure white colour and very good style. Good production, florets all at top of stem, good for bouquet work. Height 90-100cm.

1618 **White** – clear white

WINE ROSE

NEW

EARLY TIMING

replaces Sunset Wine

Improved production and earliness. . Height 80-90cm.

1649 **Rose** – bright rose.

SUNDAY

EARLY TIMING

Very high productivity, wide range of clean colours.

Lavender - Very high production and resistance to botrytis. Good production, unique colour. Light Blue with a hint of Pink.

1648 **Lavender** – light blue, height 95-105cm

JAM

MID TIMING

New generation series with strong colours. Growing speed of Jam is intermediate and suitable for all seasons, including summer flowering. High volume stems provide minimal waste. The shape of brush is well composed. Jam has a high resistance to Botrytis and its straight stems make cropping easy.

Blueberry - Highly productive, good volume, medium length stems. Minimal waste.

Strawberry - Colour comes out excellent. High productivity.

1594 **Blueberry** – violet, height 80-95cm

1596 **Strawberry** – dark rose, height 80-90cm

LUSTER

LATE TIMING - SUMMER FLOWERING

Luster is a Summer Statice

Available **ONLY** for SHIPPING:

Aug (wk 37) to Sep (wk 41)

Amethyst - Calyces open well, best bright and vivid violet, numerous brushes. Plants will keep producing voluminous and qualitative stems after 2nd flush. Height 1st flush 90-100cm, 2nd flush 78-85cm.

Violet - The colour is hard to fade. Big brushes. Good volume and productivity.

1608 **Amethyst** – clear blue

5270 **Violet** – purple **new colour**

STATICE - VERNALISED

L. sinuata (Limonium)

Vernalisation/Cold Treatment:

Statice can be vernalised prior to despatch to force it through an early winter. This ensures an earlier flowering season from March (depending on climatic location), compared to normal transplants flowering from May (depending on climatic location).

All annual & perennial Statice are available as vernalised plugs by request.

STATICE

L. sinuata - (Limonium)

Annual Plug Lead Time: 8 wks

SMASH VIOLET

replaces Excellent Blue

One phrase says it all, "Near Tissue Culture Quality at a seed price."

4659 **Violet**

RUSH

Rush series was developed with the grower in mind. Rush is an extra early series flowering evenly across all colours in a 4 week window. The plants grow without excess foliage allowing them to remain "open" for easier picking and disease control. Evenness of stem length and quality, results in very good productivity for an economical alternative to tissue culture varieties. **450 Seeds/gram**

2937 **Blue Shades** – contains the strongest blue from seed and light blue colours

2972 **Deep Blue** – blue

2962 **Mid Blue** – delicate sky blue

2963 **Pastel Shades** – contains pink, blue, rose and lilac

2938 **Pink Shades** – contains light pink and rose

2978 **Rose** – strong carmine rose

2940 **Violet** – deeper blue than Deep Blue **new colour**

2983 **White** – clear white

2974 **Yellow** – best yellow from seed, stems don't tangle

2976 **Mix** **new colour**

Cut Flowers

STATICE

L. suworowii (Limonium)
Plug Lead Time: 8 wks

SUWOROWII

Long, rat tail like spikes, used as fillers in fresh and dried bouquets. Height 80cm.
8,000 Clean Seeds/gram
2984 **Rose Pink** - rose pink

STATICE

L. dumosum/tataricum (Limonium, German Statice, Goniolimon)

Perennial Plug Lead Time: 12wks

WOOD CREEK

Indent Line

Sensational improvement in L. dumosum: disease tolerant, uniform plants with unusual mushroom shaped clouds of white flowers on erect stems. Height 50cm.
1,100 Seeds/gram
2986 **Wood Creek** - white

STATICE

L. latifolium (Limonium, Sea Lavender)
Perennial Plug Lead Time: 8 wks

LATIFOLIUM (FAIRY)

Widely grown, hardy perennial. Ideal for fresh market. Flowers the second year from Feb-Mar. Plant distance 40x40cm. Yield in the 3rd year 10-15 stems per plant. Glasshouse production is also possible. Height 60cm.
1,400 Clean Seeds/gram
2956 **Latifolium** - deep violet flowers

STATICE - PERENNIAL

Limonium
Perennial Plug Lead Time: 8 wks

MELLO YELLO

Valuable cutflower for fresh or dry use. Thin, but sturdy stems with masses of creamy yellow bicoloured florets, which do not shatter. Height 60-70cm. **1,000 Seeds/gram**
2958 **Mello Yello** - creamy yellow

ATLANTIS

PEREZII

Best strain for cutting. Uniform selection of deep lavender blue flowers on long strong stems. For Greenhouse culture or warm climates. Height 60cm. **1,000 Seeds/gram**
2936 **Atlantis** - deep lavender blue

STOCK - Non Selected

M. incana - Column Matthiola
Annual Plug Lead Time: 8 wks

DOUBLE DELIGHT

Only available in 288 Plugs

This series has all the attributes of Iron but in a double form. Over 80% doubles can be expected.

4334 **Apricot**
3048 **Blue**
4335 **Blush**
4336 **Bridal Pink**
4322 **Carmine**
2141 **Deep Yellow** new colour
0000 **Early White** new colour
4337 **Pink**
4338 **Rose**
4323 **Violet**
4339 **White**

IRON

Iron series as the name implies has strong robust stems of good marketable length and tight, highly scented flower heads in a broad colour range. Iron is early to flower in the autumn and will program for early May harvest. Iron series will give excellent quality when grown under cover or outside. Expect doubles from 60% of plants when unselected. Selection is difficult without experience. The stems are very hard and strong, the flower head is very tight between florets and the top of the flower spike does not stretch significantly reducing breakage during handling and shipping. However, if grown like other stocks Iron may produce shorter stems than other varieties. Iron Series requires special growing techniques- please refer to your Highsun Representative for these.

650 Seeds/gram

3015 **Apricot**
2174 **Blue** new colour
3017 **Cherry Blossom**
2201 **Deep Yellow** new colour
3019 **Light Pink**
3022 **Pink**
3024 **Rose**
3026 **White**
3028 **Yellow**
3021 **Mix**

TOWER

A series of extra early flowering stocks. Features the colours unavailable to the Iron series. Tower is taller and earlier by 1 week when compared to Irons. Tower fits perfectly with Noble for height and earliness.

650 Seeds/gram

3635 **Blue** - <80%
3636 **Lavender Blush** - >90%
3637 **Pink** - >80%
4325 **Rose**
1423 **White** new colour

All colours - available selected

The Tower series can be selected for doubles with experience. This is not an exact science but most colours can be selected at the cotyledon stage to produce around 80%

doubles, on average up from approximately 60% when unselected. Approximate % of doubles when selected is indicated beside the colours in each series.

TOWER PRO

NEW

Unique colours. Extra early series suits autumn production. Tall flower spikes with good quality heads. High quality seed. Timing and stem properties fit well with the Noble Series. **650 Seeds/gram**

4614 **Ruby** formerly Tower Ruby
4750 **Valentine** formerly Tower Valentine
3638 **Violet** formerly Tower Violet

All colours - available selected

NOBLE (High Double)

It is an improvement over the popular Snow Wonder, with creamy Yellow making the series. Closely arranged dense flower make massive colour on a sturdy stem. 95% or more double with no selection. Suitable for plug production. Height is 80-110cm.

650 Seeds/gram

3032 **White**
3033 **Yellow**

STOCK - Non Selected

M. incana - Branching Matthiola
Annual Plug Lead Time: 8 wks

QUARTET

This scented series has strong stems and good water uptake, making it ideal for bouquets and arrangements. Height 90cm.

650 Seeds/gram

3034 **Apricot** - pastel pale salmon
3035 **Blue** - lavender blue
3036 **Cherry** - pastel soft pink
3037 **Lavender** - lavender pink
3038 **Marine** - bright light blue
3039 **Purple** - deep purple
3040 **Rose** - bright rose pink
3041 **White** - pure white
3042 **Yellow** - creamy yellow

SUNFLOWER

H. annuus Helianthus
Annual Plug Lead Time: 6 wks

CANTO

Canto is a pollen-less variety that matures in 57 days. Canto has single flowered with dark centres. Nutrition and plant density effects stem thickness and head diameter. Flowers have a true double ring of petals. Canto's petals tend to be rounded and show a slight orange tint near the centre. Plants will reach 1.7m with irrigation. **15 Seeds/gram**

3650 **Canto**

LEMON RUSH

NEW

Single headed med/quick cutflower type.

Cut Flowers

Approx 60 days to flower. Eye catching lemon coloured petals surround a dark centre. Pollen free. Excellent vase life. Uniform plant type.

15 Seeds/gram

5260 **Lemon Rush** - lemon coloured petals surround a dark centre

ECLIPSE NEW

Lunar: A multi headed med/quick maturity cutflower variety. The standout feature of this variety is the vivid colour contrast it displays, with a rich red inner ring surrounded by a light lemon outer colour. It also grows to an excellent height for cutting and has an excellent vase life due to its pollen free characteristic. It displays a larger primary head which flowers first, followed by the secondary axial branching flowers which are ideal for use in bouquets and smaller bunches. 15

Seeds/gram

Solar: Days to flower approx 59. Pollen free. A single headed, quick maturity cutflower variety. It displays a striking colour contrast with it's golden yellow petals which surround an inner rich red ring. Solar Eclipse has proved to be a standout performer in the cutflower market. It grows to an ideal height for cutting and has an excellent vase life. Height is 130cm. 15

Seeds/gram

5257 **Lunar** - rich red inner ring surrounded by a light lemon outer colour.

5258 **Solar** - golden yellow petals surround an inner rich red ring

MERIDIAN NEW

Gold: replaces Solo

Medium/quick cutflower variety. Approx 57 days to flower. Long golden yellow petals, extra dark centre. Pollen less, excellent vase life. Medium height approx 120cm. 15

Seeds/gram

Yellow: replaces Vada

This has similar plant habit and flower conformation as Vada but matures 3-5 days earlier. 15

Seeds/gram

5263 **Gold** - golden yellow petals, extra dark centre

1772 **Yellow**

RACEY ORANGE NEW

Fastest series to flower. Quick cutflower type, approx 53 days to flower. Attractive oval shaped orange petals, dark centre. Pollenless. Excellent vase life. Uniform plant type. Medium height approx 120cm. 15

Seeds/gram

5261 **Racey Orange** - orange petals, dark centre

ROYAL VELVET NEW

Days to flower 66. Pollen free. Royal Velvet is a medium maturity multi-headed cutflower variety. It has an attractive deep red petal colour which makes it quite unique as an ornamental sunflower. It supports a larger

www.highsun.com.au

primary head which flowers first followed by smaller axial branching flowers. This feature gives it a longer overall flowering period which makes it great for the home gardener or commercial flower grower. Height is 150cm. 15

Seeds/gram

5262 **Royal Velvet** - deep red petal colour

SWEET WILLIAM

D. barbatus (Dianthus)

Annual **Plug Lead Time: 9 wks**

HOLLANDIA F1

Hollandia is suitable for spring and autumn flowering. It doesn't require cold. For best harvest, sow end of November for autumn flowering and following spring. Height 50cm. The Formula Mix has received a Fleuroselect Quality Star award. 1,200

Seeds/gram

3061 **Mix**

HERITAGE

This Fleuroselect Quality Mark winning Heritage series will bloom extra early and does not require low temperatures to initiate flowers. Plants have sturdy stems that make it excellent for landscaping and high density planting. Heritage can also be used for mixed containers. Height 40-50cm. 1,200

Seeds/gram
