Quality Seed at the right price

*Deliveries Australia wide,
Western Australia
requirements catered for.*

Seed Types

Highsun offers you the latest in seed enhancements for precision seeding, clear seed visibility and optimum germination and seedling vigour. The seed type is displayed in the catalogue as: - **Coat** = Coated seed, **Det** = Detailed seed, **Elit** = Elite seed, **Mult** = Multi Pelleted seed, **Pell** = Pelleted seed, **Prim** = Primed seed, **Seed** = Raw seed

Coated

- some seeds are coated to provide uniform size and shape for seeding
- improves flow and individual sowing through automatic seeders
- uses bright colours to improve visibility

Detailed

- marigold seeds are treated to remove fuzzy tails
- minimises the risk of disease, which is carried in the tail
- improves flow and placement of seeds in plug trays

Elitech

- is seed that has had its quality improved by one or more of the following techniques or treatments.

- graded to help ensure fast uniform germination
- clipped or detailed Marigold allowing sowing to be automated whilst reducing the risk of seed borne disease
- fungicide treated to reduce seed borne disease
- primed to ensure germination potential is maximized

Multi Pelleted

- multiple seeds are enclosed in each pellet
- allows for uniform sowing of multiple seeds per plug

Pelleted

- small seeds are coated to allow more manageable, uniform shape

- allows easier handling for more reliable, faster mechanical sowing
- uses bright colours to improve visibility

Primed

- seeds are treated to begin the biochemical process of germination then stopped just prior to radical emergence
- provides maximum and faster germination, even under a wider range of temperature and environments
- **Primed seed must be properly stored and used within 6 months of receipt
