IMPORTANT LISIANTHUS INFORMATION

PLEASE READ THE FOLLOWING

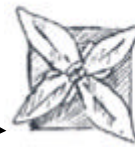

We are doing everything possible to deliver the optimum quality Lisianthus plant to you, and because of this it is important that you read the following so that you are fully aware of how we will be supplying your products.

1. BE PREPARED

We will do everything possible to get you your plants on time, as per your order. However sometimes due to changes in weather your product may be ready a week or so either side of your scheduled dispatch date. It is vital that you are ready to accept your product at least one week earlier than the scheduled dispatch date to optimize the growing opportunities for your plants.

2. TRAY SIZE

As per our discussions with you at order entry stage, and as per the information on our web site, it is important to plant your Lisianthus before it starts to stretch up. Therefore we are sending out more juvenile plants than we have in the past so that it benefits YOU! If you have ordered your plants in a 288 normal/shallow tray, you will be receiving a more juvenile plant. ***Please see picture.***

If you do not wish to receive your product in the juvenile stage, and prefer to plant the more advanced stage, you will have to order your plants in our deeper trays, and these will be slightly more expensive than our shallow/normal trays.

Please see pictures.

PLEASE NOTE: There are RISKS attached with planting your Lisianthus plug at the more advanced stage. The risks include the potential to flower short or to rosette during summer months. By ordering in the deeper tray you are automatically accepting these risks and therefore Highsun cannot be held accountable.

If you are unsure which tray type you have ordered, or you wish to change your order, please call our Head office immediately to confirm so that any changes can be made before your product is seeded.

Further Cultural Information may be obtained from our Cultural Notes on www.highsun.com.au or by contacting GrowSearch Australia PH: 07 3821 3784, Fax: 07 3286 7618, Email: growsearch@dpi.qld.gov.au, Web: www.dpi.qld.gov.au/growsearch
