

Coleus blumei

Giant Exhibition

A reselection of the true old fashioned type Coleus. The extra large leaves are particularly showy and colourful and considered a fashionable "heirloom" plant. It is especially selected for house plant use, but is equally suitable for outdoors in a sheltered position during the summer months or as "dot plants" in summer bedding. It is suitable for year round production in 10cm pots, with a 13 week crop duration from seed.

Rainbow

Field grown mix of all colours at an economical price.

mix

Coleus hybrida - extra dwarf

Fairways

Extra dwarf, basal branching series with numerous branches and short stems. Ideal for cell packs as well as 10cm pots. Very late flowering gives this series a long shelf life.
