Presto®

Presto® is a true breakthrough in the Coreopsis assortment. This variety is naturally dwarf and compact. For the grower, Presto® is the perfect variety to produce in packs or trays. The production cycle is short and the crop easy to manage. For the home gardener, Presto is a very good garden performer, producing masses of flowers throughout the summer. First year flowering perennial. Height 25cm.

Sunray™

NOT SUITABLE FOR POTTED COLOUR

Ideal perennial for the borders, particularly appreciated for its masses of double bright golden yellow colour. Removing dead flowers regularly, will keep the plants busy producing numerous fresh flowers thus providing a golden yellow colour in the border for long periods. Grow as cool as possible. Height 50cm.
