

Geranium - *P. x hortorum*

Nano

“Another dwarf with the same pedigree as Petunia Limbo & Mambo”

- Nano is the earliest to flower and plants continue to bloom producing numerous flowers at a time.
- Dwarf seed variety bred for use in small containers.
- Plants have good vigour and have performed well under Australian conditions.
- On maturity plants produce a neat, rounded shape of 20-25cm.
- Once established, they are relatively drought hardy.
- Leaves are well zoned which contrast nicely against the flowers.

Nano's plant vigour and flower power are superior to other dwarf varieties currently available.

Nano vs Horizon

Retailers love dwarf Limbo & Mambo - now too Nano

Apache F1

GREEN FOLIAGE WITH DARK ZONES

Apache is early flowering and extremely basal branching. Apache is vigorous yet compact in growth and develops a profusion of large flowers on compact plants. Apache has the best features of both multiflora and standard geraniums, and will outperform most seed raised geraniums currently available. Apache grows well in plugs, packs, pots. Continuous blooming in the garden make the Apache series suited for mass plantings. Apache is the nearest you will get to a cutting raised geranium. Garden height: 25-30 cm.

Features:

- extremely basal branching
- very early to flower
- vigorous yet compact growth
- excellent in all planting situations

Bulls Eye™ F1

RICH CHOCOLATE FOLIAGE

Bulls Eye™ geraniums feature dark chocolate foliage that retains its richness, even under high light conditions and contrasts with self cleaning flowers. Bulls Eye™ exhibits Maverick™ type performance on the bench and in the field. Easy to control, so fewer PGR's required. Crop time 14-16 weeks. Garden height 32-37cm.

Multibloom™ F1

MULTIFLORA - GREEN FOLIAGE WITH DARK ZONES

Multiblooms™ are one of the earliest seed geraniums on the market and have the greatest number of flowers per plant. They work well for plug, pot and pack production. Regarded as true bedding plant geraniums, Multiblooms™ are perfect for mass planting. Consumers can count on long season flowering with these compact performers. Garden height 25-30cm.

Maverick™ F1

GREEN FOLIAGE

Mavericks were bred for high density mass production. Their open plant habit allows sunlight to shine through - even in pot tight conditions. The results are multiple flower stems, early flowers and less yellowing of leaves. Uniformity across the series means growers can expect bench run sales of 10-15cm pots and larger containers. Maverick™ is very Cycocel responsive and is easy to control in plugs or packs. Garden height 35-40cm.
