### Group 1 & 2 Winter Forcing Overture Series

Stunning Overture really raises the bar for winter blooming snapdragons and has breathed new life into winter cut flower sales.

- Group 2 flowering for growing under relatively short days, lower light intensity and lower temperatures
- superior stem length and calibre
- single stem plants support large flower spikes
- spikes have tightly spaced florets
- uniform flowering for all colours within the series

Height 100-130cm.

## Group 2 & 3 Autumn & Spring Forcing

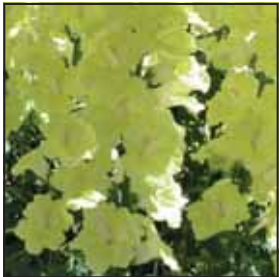

### Chantilly Series

The delicate butterfly (open face) type snapdragons offer beauty to any arrangement. They will bloom early when grown under low temperatures. Days from sow to flower are 110 - 120 days. Chantilly grows like a traditional snapdragon.

- large, open face flowers
  - longer vase life than other varieties
  - stem length approx 120-140cm
  - pink is improved to avoid colour fading on petals
- Height 100-130cm.

## Group 3 & 4 Summer Forcing

# Opus Series

Another quality snapdragon in this later flowering group from the same breeding as Overture. With most of the important colours available at present, it represents the latest in quality breeding.

- easily blooms for late spring, summer and early autumn sales
- features superior stem length and caliper
- long spikes have tightly spaced florets
- eleven vibrant colours

Height 100-130cm.

### Group 2 & 3 Varieties

Suitable for growing outdoors or in covered structures during spring & autumn

## Costa Series

Forget about groups with Costa. Early indications from Highsun Trials show Costa's perform over a period extending from winter to late spring, thus removing some of the complexities of understanding groupings. Costa is long lasting, giving potential to improve the demand of Snapdragons.

- improved uniformity
- the whole crop can be harvested in 2 cuts
- a robust quality
- large individual florets packed tightly on thick stems

Height 80-120cm.
