Highsun Express

Calendula officinalis

Nakayasu

REPLACES PRINCE COLOURS

Indent Line

Nakayasu is basal branching, with good vigour and uniformity. Calendula prefer cool temperatures, however during the cold season do not overwater as moist conditions will lead to black rot. When grown during hot conditions the flowers will be smaller. By pinching the centre stem 60 days after sowing, the plant will produce 8-10 good quality cut flowers. Height 91-110cm.

1291 golden - golden yellow

1290 orange - bright orange

Prince

Indent Line

Becoming increasingly popular, Prince can be grown year round as not daylength sensitive. Good double flowered cutting variety for cool greenhouse and outdoor culture, suitable for forcing. Height 60cm.

1289 indian - bronze orange, dark hear

Disclaimer: "Significant variations in seed, variety and crop performance, in results and in crop outcomes may occur depending upon geographic location, climate, soil type, soil conditions, cultural and management practices and other growth and development factors. Any cultural and descriptive information or other advice, recommendation, information, assistance or service provided by Highsun Express is intended as a general guide only and should not be relied upon and is provided without liability or responsibility (including for negligence) on the part of Highsun Express. It is recommended that in all cases a small scale trial production is undertaken in order to test local conditions and circumstances that may affect the crop."
