Highsun Express

Although Campanula medium is a beautiful cutflower, which should not be left out of any spring bouquet, it had one disadvantage in that it needed a two year cultivation period. It therefore hardly found its way to the consumer. This has changed with the all new Champagne Series. The wonderful flowers, short cultivation period and high productivity mean first class cut flowers.

### *Campanula medium x F1 hybrid*

## Champagne F1

### ANNUAL

Champagne is an attractive cutflower which is also suitable for production in big containers. Fast finishing, high yielding series has bell shaped, 4cm diameter blooms. New Lilac is a shade darker than Lavender. Uniform, basal branching plants with 8-10 stems per plant. Height 65cm.

1294 white

### *Campanula rapunculus*

## Heavenly

### PERENNIAL

Heavenly Blue is a form of Campanula for cut flower production that does not require vernalisation to initiate flowering. Through daylength manipulation, using "mum lights", moderate temperatures of 13°C, scheduled flowering allows continuity of supply. Crop production and timing is similar to C.medium Champion series. Height 60-80cm.
