Seed Culture - belladonna type

Angel Super F1

Unlike column delphiniums, Angel Super retain all petals after harvest, increasing customer satisfaction.

- excellent spray form for bouquets
- crop height is uniform within the colours
- stem length 65-90cm
- no shattering of petals
- fine foliage is easy to work with
- up to 10 stems are possible including the second crop
- vastly improved for hybrid vigour, exhibiting:
- longer stems
- better performing plant
- higher yield
- more flower volume

Seed Varieties - elatum type

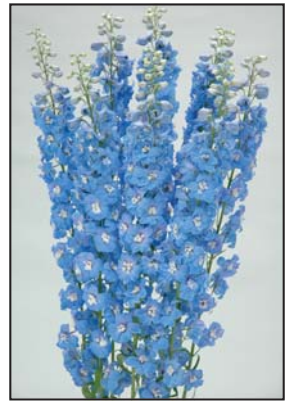

Triton F1

Triton was a clear standout in our 2006 Spring Trials. Clearly superior to Aurora in all aspects. Two colours kick off this series including the popular dark blue.

- easy to handle stem calliper - not too thick
- densely packed florets form a long head
- 30% faster return crops than existing varieties
- higher stem counts per plant
- easier for Florists to use

4956 dark blue

4957 light blue

Aurora F1

Aurora is an exceptional F1 Delphinium and its popularity continues to increase due to its outstanding performance. Unlike other Delphinium varieties, the Aurora series is noted for its vigour, dense flower placement on strong stems, excellent uniformity and quality. The plants attain an average height of 90-120cm. Aurora can be used as large container plants as well as high quality cut flowers. Aurora can be grown year round in cool climate areas because of the earliness in flowering

Seed Varieties - belladonna type

Magic Fountains

Magic Fountains has the widest colour range in a dwarf Pacific type Delphinium. It also consists of many bicolours. Due to its relatively compact nature, we particularly recommend this series for smaller gardens and windy areas where tall types are easily damaged. Excellent for cut flower production Garden height 75-90cm.
