

Propagation technology *fast-tracking your plants*

PAPERTEC is an innovative propagation system where plugs are made of bio-degradable paper, and filled with a growing medium.

Cost effective

- Use less water
- Less waste
- Suitable for mechanical transplanting equipment

Time efficient

- Reduce rooting time by 3-12 days
- Quick to water
- Ready to use

Improved propagation

- Uniform and healthy growth
- Made to order and always fresh

Environmentally friendly

- Bio-degradable paper
- Efficient water consumption

Innovative

- Efficient drainage system
- Root penetrable paper
- One or more cuttings per pot
- Improved air circulation
- Growing medium made to individual requirements
- Suitable for cuttings and seeds

Plug and tray sizes

Papertec 36 sold as 2 x 18 strips (45mm diam x 50mm deep)

Papertec 50 sold as 1 x 50 tray (45mm diam x 40mm deep)

Papertec 72 sold as 2 x 36 strips (25mm diam x 45mm deep)

Papertec 102 sold as 2 x 51 strips (25mm diam x 40mm deep)

Papertec 128 sold as 1 x 128 tray (25mm diam x 40mm deep)

- Custom Tray Orders available on application
- Delivery available in Cartons or Pallets
