

# New Developments at Highsun

**H**ighsun is the new distributor for Florist Gerberas and Anthuriums for both the potted colour and cut flower market. Florist de Kwakel BV is a well known Dutch breeding company that will be

supplying Highsun with quality tissue culture plants which will then be grown on and distributed to all states in Australia. Information on the colours and varieties available can be found on <[www.gerbera.com](http://www.gerbera.com)> and <[www.anthuriumplant.com](http://www.anthuriumplant.com)>

Highsun also has some changes in personnel and would like to announce the appointment of Ross

Herford who will be looking after sales in NSW for all Highsun products. Ross has a wealth of experience with the 'Florist' varieties along with other nursery products and will be available on a full time basis to discuss your planting needs.

Changes of roles within the company include Jayson Kent who will now be looking after

Queensland and technical sales for all plant, plug and seeds along with the co-ordination of all national sales activities.

The Highsun team is now even stronger, with new varieties from 'Florist' along with comprehensive technical and product support from a team of professionals willing to help you with your planting needs. More information on <[www.highsun.com.au](http://www.highsun.com.au)>
