

EDIBLE DELIGHTS

EDIBLE DELIGHTS

Dear Customer,

I am pleased to re introduce our Growers Selections Range. Well known for the Chill Outs, we are also adding Patio Pals, Table Tops and Rich Pickings. The demand for patio vegetables has hit Australia like a whirl wind. Retail are demanding high quality vegetables able to be grown in pots and containers where there is limited space.

Chill Outs have been popular for the past two years. Highsun have continued to secure the distribution rights for the Explant range of chillies. These attractive plants boast edible fruit with medium to hot taste. Their ability to be transplanted into tubs makes them more popular for patios, where they can continue to fruit over the summer. Hot Burrito is a new edition to the 2013 range.

Patio Pals are a combination of existing and new lines with creative breeding from Vegetalis. Highsun have secured the distribution rights for the Vegetalis range of patio vegetable varieties and are pleased to offer a wide variety of edible chili's and tomato's. The appeal of Patio Pals is the bright coloured fruit able to be grown in large containers or hanging baskets.

Table Tops are a range of sweet capsicums and tomatoes. Using the best selections from Explant and Vegetalis this range will be popular with all varieties able to be grown in pots. Great for patios and window sills in troughs.

Rich Pickings are our own selection of capsicum, passionfruit, egg plants and tomatoes grafted onto strong, vigorous rootstock. Grown in pots, Rich Pickings provide a plentiful yield in the veggie garden.

We are looking forward to supplying you with our creative range of potted vegetables and fruit, now and for years to come.

NEW

Espelette

Patio Pals

Cayennetta Chilli Pepper

AAS Winner 2012

Cayennetta is a compact branching cayenne type chilli. It has a very neat, attractive habit and produces a large crop of bright red 4 inch tapered fruit underneath the attractive leaf canopy. The fruit are mild in heat reaching around 20,000 Shu (Scoville heat units). Cayennetta has tolerance to both very hot and cold seasons making it a good all round performer in any garden.

Chenzo Chilli Pepper

Compact well branching plants that form an attractive, neat dome. Fruit are black maturing to bright red and crop heavily. Chenzo has a good resistance to cool temperatures.

Suitable for fresh chilli use or for drying. Chenzo is very well suited to pots, containers and window boxes. Schoville heat rating approx. 45000shu.

Shown in 100mm pot

Basket of Fire Chilli Pepper

A prolific fruiting variety which is dripping with small hot fruit on a compact leafy semi-trailing plant. The fruit mature from deep purple through cream and orange to mature to a bright red.

Basket of Fire's unique plant habit makes it a perfect choice for hanging baskets and containers. The plants have a good tolerance to cooler weather lasting well into the Fall. Harvested fruit are easy to dry as well as being ideal for fresh use. Schoville heat rating approx. 80000shu.

Shown in 100mm pot

Premium edibles for hanging baskets and large tubs. Ideal for the patio gardener in 300mm pots. Fruits Summer, Spring and Autumn. Pot sales 16-18 weeks.

Apache Chilli Pepper

A very attractive compact Chilli Pepper producing masses of super-hot, bright red fruit. Apache is a very adaptable plant that will grow happily in most container sizes. Apache can also be kept very compact for use as a Bonzai plant. Schoville heat rating approx. 80000shu.

Shown in 100mm pot

Megabite Tomato

A compact Tomato producing unusually large fruit for the size of plant. The bright red fruit are much larger than Totem. Plants have a very strong stem which support the plants well but may require some support to aid the large amount of fruit. The fruit are multi lobed with a high percentage of flesh.

Tumbling Tiger Tomato

A compact trailing variety with red and green striped fruit. Plants are very neat and useful for planting in mixed baskets and containers. Fruit are protected by the foliage which is useful to protect from scorch in very high light levels.

Shown in 150mm pot

Table Tops

Sweet Snack Capsicum

A compact habit, suiting pot production. Bears an amazing amount of fruit. Fruit colours red, orange and yellow. Labels available from Norwood.

Premium edibles for 125-180mm pots. Ideal for table tops and window sills. Fruits Summer, Spring and Autumn.
Pot sales 16-18 weeks.

Sweet 'n' Neat Tomato

The Sweet 'n' Neat series is an extra compact type suitable for use in a small container or even on a kitchen window sill. The very neat, compact plants are easily retailed showing green fruit. With a very short production time. Available in Cherry Red and Yellow.
Shown in 150mm pot

RICH PICKINGS *Grafted*

Rich Pickings are our own selection of grafted fruit and vegetables.

Grafting with detached scions has been practiced for thousands of years, dating as far back as 2000 BC. Rick Pickings, refines this technique to provide quality Heirloom fruit and vegetables grafted onto high disease resistant rootstock.

The rootstocks have been chosen to deliver the best combination of increased vigour and disease resistance. Our rootstocks are bred to perform in

a wider range of soil temperatures thus enhancing the opportunities for you to increase sales during the shoulder period with earlier sales.

Tomato

Tomato grafted on Kalyon F1 rootstock

Grafted tomato plants produced up to 50% more fruit than standard seeded varieties in our 2012-2013 Qld trials.

- | | |
|----------------------------|---------------------------------------------------------------------------|
| Apollo | A favourite for early production is now even earlier! |
| Black Krim | Violet-red, slightly flattened 110 – 125mm fruits with black shoulders. |
| Tomato Tropic (Mighty Red) | Slicing tomato not too soft, less juice and perfect for sandwich's. |
| Carmello | A favourite for Southern state of Australia, have intense, smoky flavour. |
| Grosse Lisse | A home gardener favourite, one of the best tasting. |
| Roma | Super charged and best for cooking. |
| Rouge de Marmande | An Italian favourite that is sure to please. |
| Black Cherry | Makes a great addition to salads or just to snack on. |
| Sweet Cocktail | Grafted cocktail will keep your street supplied! |

Capsicum

Capsicum is grafted onto a fusarium and verticillium wilt resistant rootstock.

Double Up F1 Sweet mama type

Medium to large, mid-early maturing, 3-4 lobed, blocky bell capsicums. Yields high quality fruit. Known for its wide adaptability. Disease Resistance/Tolerance: BS1-3. Fruit is green and turns red.

The latest trend in the vegetable garden, grafted by hand, edibles. More fruit, earlier and over a longer period for higher yields. Fruits Summer, Spring and Autumn.

Passionfruit

Passionfruit grafted onto DPI certified flavicarpa rootstock, non invasive.

Edulis

This Norfolk strain has small sweet fruit produced from lovely purple and white flowers. A prolific variety producing masses of green fruit maturing to a dark purple. Suitable for cooler temperatures. Summer cropping. Susceptible to leaf diseases.

Molissima

The banana passionfruit. This plant has showy pink flowers followed by long yellow banana like fruit which are very good eating. It will tolerate some frosts, is difficult to grow in hot climates and generally weak vigour. However having good fruit volume and taste, a grafted Molissima has potential with flavicarpa rootstock, to address otherwise weak roots.

Sweetheart

Just the way passionfruit should be. Small fruit and plenty of them with intense flavour and not tart. One to savour. Teardrop shaped dark red fruit. Recently commercially introduced. Suitable for temperate regions.

Norfolks Pride

This selection of Norfolk Island Black passionfruit has been grafted onto a vigorous rootstock resistant to disease. It will tolerate cool conditions to yield abundant harvests of small black sweet fruit.

Eggplant

Eggplant grafted onto new interspecific hybrid solanum rootstock – Koksai F1

Bonica

Nice glossy deep purple variety. One of the earliest in its class. 15-16cm long fruit. Tear drop shape.

Mini Lebanese

Well-branched, medium early and quite prolific with 2-3 purple flowers bearing fruits on one node.

Attractive purple reddish fruit with tender white flesh.
